StoryCast

Research Document: sitemap, wireframes and high-fidelity mockups.

StoryCast is a three-page accessible microsite for first-person video and audio stories. This document covers the planning and design work behind it: how the pages connect, how each page is laid out at three screen sizes, and the visual design. Code and files: https://github.com/murinziben/storycast

1. Sitemap

The site is one level deep. The Home page is the entry point and links to the story pages and the About page. Visitors can also move between any pages from the header and footer navigation. This is the link for the sitemap: sitemap link.

Page	File	Purpose
Home	index.html	Introduces the project and links to each story. Hero, featured stories, audio stories, mission.
Story 1: She Creates Change	story/story-one.html	Video story with captions, a full transcript, accessibility information, and related stories.
Story 2: Motherhood	story/story-two.html	Second video story, same layout, so visitors learn one pattern.
About	about.html	Mission and the accessibility statement (WCAG 2.1 AA).

2. Wireframes

Low-fidelity wireframes for Home, Story, and About at desktop (1440 px), tablet (768 px), and mobile (390 px), together with a six-scene visitor-journey storyboard.

Wireframes (Figma, page 2):
https://www.figma.com/design/peUIbsy5zzb8otJ0jKyz95?node-id=1-2

Screen	Layout decisions
Desktop 1440	Three-column story grid; story page has video and transcript on the left, accessibility information and related stories in a side column.
Tablet 768	Two-column grid; the side column moves below the transcript.
Mobile 390	Single column; navigation collapses to a Menu button; every control keeps a 44 px minimum touch target.

3. High-fidelity mockups

Full-colour mockups of all three pages at the same three screen sizes, built from a shared design system (variables, text styles and components) so the Figma file and the Sass code use the same token names.

High-fidelity mockups (Figma, page 3):
https://www.figma.com/design/peUIbsy5zzb8otJ0jKyz95?node-id=1-3
Design system (Figma, page 1):
https://www.figma.com/design/peUIbsy5zzb8otJ0jKyz95?node-id=0-1
Annotations and container-query example (Figma, page 4):
https://www.figma.com/design/peUIbsy5zzb8otJ0jKyz95?node-id=1-4

Decision	Detail
Colour	Forest green #123C32, lime #C7F36B, off-white #F7F7F0, charcoal #202522. Text pairs checked against WCAG 2.1 AA contrast (4.5:1 body text, 3:1 large text).
Typography	Bricolage Grotesque for headings, Public Sans for body text.
Components	Buttons (default, hover, focus), navigation, footer, video card, audio card, video player, transcript, related story, accessibility block.
Container query	The audio card switches between a horizontal and a vertical layout at a container width of 520 px, independent of the screen size.
Accessibility	Captions and a full transcript for every video, keyboard controls (K, C, M, F, arrow keys), a visible 3 px focus ring, no autoplay.
